

A screenshot of a PyCharm terminal window titled "waether". The window shows the command line output of running a Python script named "waether.py". The output includes the path to the script, followed by three lines of weather data: average rain (1.9 inches), average wind (35.0 mph), and a calculated weather severity (54.0) for three readings. The process exits with code 0.

```
C:\Users\aMeer\PyCharmMiscProject\.venv\Scripts\python.exe C:\Users\aMeer\Downloads\waether.py
The average rain is 1.9 inches
The average wind is 35.0 mph
The weather severity for these 3 readings is: 54.0

Process finished with exit code 0
```
